# RPC 60

## REVERSIBLE PLATE COMPACTORS

Heavy duty reversible plate compactors with optimum compaction performance.

A powerful diesel engine, makes the RPC60/80 series an economical alternative to heavy vibratory rollers.

The base plate is designed for fast compaction on stone and soil material on large surfaces. Excellent for building foundations and backfill against supporting walls.

BUILDING A SUSTAINABLE FUTURE

## FEATURES & BENEFITS

- High end compaction from extra high centrifugal force.
- Easy to control with hydraulic gear shift mechanism.
- Petrol & Diesel models to suit all kind of applications combining low weight with high compaction force.
- Designed for easy maintenance with removable covers, belt tensioners and self priming hydraulic systems.
- Built-in lifting points enables machines to be easily moved on site.
- Engine protection frames protect the machines from tough site conditions.
- Foldable handle which provide easy moving, minimum size for transport and storage.
- Compact design combined with excellent ergonomic and low hand arm vibrations which minimising operator fatigue.
- Includes 2 x 125mm baseplate extension plates.
- Customer colour options available.
