FEATURES & BENEFITS

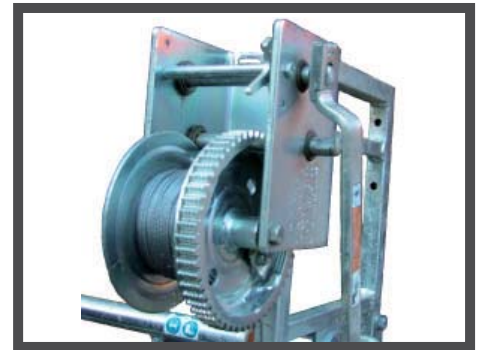

- Very high compaction is achieved by high power concrete vibrators to a depth of 300mm.
- High power pneumatic vibrators give powerful and equal vibration along the full length of the screed.
- Adjusts in height to achieve very high tolerance on surface flatness. Can also be adjusted to achieve a crown or invert (Crown Invert Bracket on Pneumatic models only)
- Built in kit form 3 screed lengths to form 3-25m screed lengths matched to the application.
- High output, up to 75m³ concrete laid per hour.
- Suitable for use with very low slump concrete.

HIGH OUTPUT WITH UP TO 75M³ OF CONCRETE LAID PER HOUR

ADJUSTABLE CROWN OR INVERT BRACKET

ROBUST PULLEY SYSTEM

TECHNICAL SPECIFICATIONS

Sections	(m/ft)	0.61/2	1.52/5	2.28/7.5
