BLOCK LOCK

MATERIAL CLAMPING SYSTEM

A simple yet highly effective clamping solution designed to make cutting, drilling, and grinding safer and easier on site.

This innovative system allows a wide variety of materials, including blocks, bricks, slabs, and other construction elements, to be easily and safely secured in place - all completely handsfree.

The design combines strength and stability with lightweight portability, making it effortless to move around site.

Exceptionally versatile and user-friendly, Block Lock is the smart choice for professionals who need a reliable, go-anywhere material clamping solution.

FEATURES & BENEFITS

- Durable, robust steel design with high quality finish.
- Fully adjustable cutting table.
- Lightweight design allows for easy on site portability.
- Foldable, compact design for easy storage when not in use. No tools required to fold-down into the storage position.
- Can be held vertically or horizontally when being carried.
- Non-slip, checker tread plate.
- Toothed-edge base to dig into the surface for added stability.
- No-slip, toothed treadle for added grip when adjusting the clamp.
- Holes in the tread plate to allow the Block Lock to be secured to scaffolding boards.
- Can be used with the various materials such as bricks, blocks, pavers, slabs, roof tiles and many more...
- Ideal to be used alongside the Altrad Belle DC 300E+ 82v 300mm Disc Cutter which is part of the E+ 82v range.

FULLY ADJUSTABLE CUTTING TABLE

TOOTHED TREADLE FOR ADDED GRIP

CAN BE HELD VERTICALLY OR HORIZONTALLY WHEN BEING CARRIED

TECHNICAL SPECIFICATIONS

Model		Block Lock
