MixerLock

CEMENT MIXER SECURITY DEVICE

The MixerLock is a simple yet highly effective solution for transporting your Minimix 150 safely and securely.

Designed to fix directly onto the back of a various vehicles, the robust bracket system firmly holds the mixer in place, preventing movement during transit and protecting your equipment from damage and theft.

Built from durable, heavy-duty steel, the MixerLock provides peace of mind on the move. Quick to install and easy to use, it eliminates the need for makeshift tie-downs or unreliable straps, ensuring your Minimix 150 stays exactly where you need it—ready for the next job.

With the MixerLock, transporting your mixer has never been safer, simpler, or more secure.

FEATURES & BENEFITS

- Durable, robust bracket system made from heavy-duty steel.
- Quick to install and easy to use.
- Highly effective anti-theft device to stop the mixer getting stolen from a vehicle.
- Secures the mixer to the back of the vehicle to stop movement during transit.
- Allows the mixer to be left on the tip-bed whilst discharging a load.
- Eliminates the need for makeshift tie-downs or strapping.
- Supplied with bolts and anti-tamper nuts.
- Available with or without the anti-tamper, anti-drill, heavy-duty safety padlock.
- Padlock comes with 10 keys to allow multi-person usage.
- Can be used on the following vehicles:-
 - > Trailers with or without caged sides.
 - > Flatbed or tipping vans /trucks.
 - > 4x4 vehicles that you can access behind the bulk head and without a roller shutter back.
 - > Wagons with a front head board - all sizes.
 - > Vans with a built-in bulk head
- Ideal for use with the Altrad Belle Minimix 150 or Minimix 150E+ mixers.
